Dear Parents

### KS2 Mathletics Update

You may have noticed that Mathletics have recently updated their website and has a slightly new look. This has, however, caused difficulty for some of your children accessing their home learning. If you are experiencing complications, you will need to check several things on your computer:

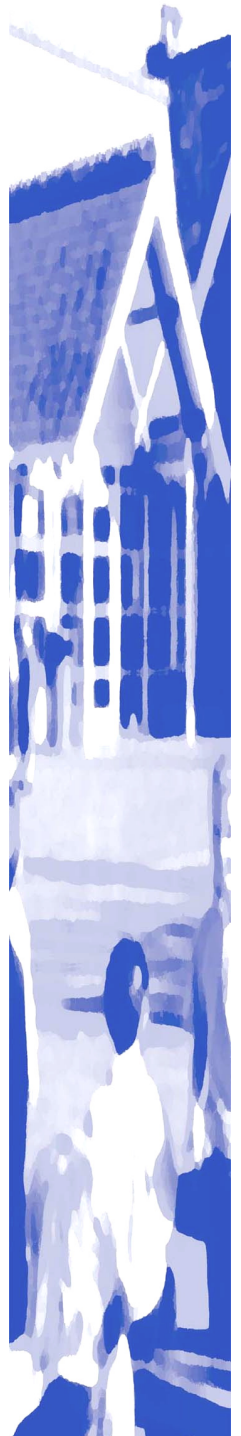

- First, you must ensure that pop-ups are enabled and not blocked for the Mathletics website. This can be done by opening your Internet browser and clicking on the 'tools' tab at the top right or left of the window, then clicking on the Pop-up blocker option and changing the Pop-up blocker setting to allow Pop-up from [www. Mathletics. co. uk](http://www.Mathletics.co.uk).
- Secondly, you may need to update your flash player, which is the software needed to run Mathletics games. Flash player is made by Adobe and is safe to run on your computer. You can find the new software at <http://get.adobe.com/flashplayer/> from here you will be able to download and install the latest version of Flash Player.

I hope that this helps sort out any problems that you may be having with Mathletics.

Mr Smith  
Mathletics Champion
